YSciT™ (Young Scientists in Training) creates a student-centered, non-traditional teaching environment that will integrate students with groups of diverse individuals from various ethnic and cultural backgrounds, gender, age and faith.

Limited availability - contact us ASAP.

Hands-on Learning

Students learn to appreciate science through experimentation, observation and demonstration.

Our workshops explore field research, experimental design and data analysis centered on Biological and Environmental Sciences.

Ages range from 7 to 17 years of age in small groups encourage peer-to-peer learning.

Student to teacher ratio is 8:1.

After School Expanded Learning

YSci™ (Young Scientists in Training) will supplement the regular school curriculum during the school year. Daily workshops of science discovery and homework assistance.
